About UVS Engineers

- UVS Engineers is focused on constantly improving manufacturing solutions to enhance productivity for industrial sectors while maintaining cost to performance ratio.
- The product portfolio is managed to connect various segments of the manufacturing processes. This helps us create innovative complete solutions for companies looking for a one stop shop.
- We are partnered with highly competitive and innovative companies from Japan, Germany, Taiwan, Israel and India to provide advanced solutions to our customers.
- We have developed a professional network of sales and service executives to provide innovative cost-effective solutions across all major industrial clusters within India.
- With over 25 years of experience, UVS Engineers commits its customers with firm solutions, service, and optimisation of our products.

OUR VISION

“To be recognized for providing constant improvisations and solutions to increase efficiency and productivity to manufacturing companies...”

Battery Tools

- Innovative line of torque-controlled shut-off cordless power tools for assembly lines.
- Automatic shut-off mechanism designed for manufacturing where torque accuracy is critical.
- Manufactured in Japan, these tools offer a torque from 3~650 Nm.
- Zero reaction on the operators' arm.
- Can be combined with Poka-Yoke systems for 100% error proofing.

Panasonic

Pneumatic & Electrical Tools

- Wide range of industrial and professional tools for applications including bolt/screw tightening, drilling, tapping, grinding, sanding, polishing and hammering.
- Air motors and riveters along with variety of airline accessories.
- Suitable range for light to heavy duty manufacturing processes even under extreme conditions.
- Custom made solutions for special applications.

K KATASHI
INNOVATIVE PERFORMANCE

Torque Wrenches

- Range of manual torque setting instruments for small screws to heavy duty bolts.
- Click, Dial, Analog and Digital solutions available for a variety of applications.
- Torque analyzers/calibrators to cross-check torque wrenches.
- Japanese engineered tools for precise accuracy and world class quality.
- Catering for a wide torque range; from 0.01 Nm to 2100 Nm.
- Can be combined with Poka-Yoke systems for 100% error proofing.

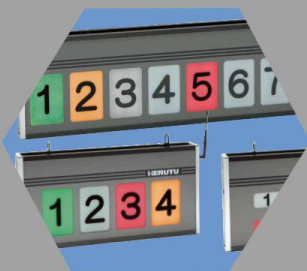

Your Torque Partner
TOHNICHI

KATASHI
INNOVATIVE PERFORMANCE

Error Proofing Systems

- Highly accurate wireless Poka-Yoke systems with data logging functions. Compatible with a wide range of battery tools, torque wrenches, pliers, marking pens.
- Wireless call systems (Andon System) to maximize production in medium to large manufacturing units.
- Wireless tooling systems which reliably control distant machinery and equipment using specialized transmitters and receivers.
- Wireless bolt counting systems make sure that every product is manufactured to the guidelines.
- Designed and manufactured in Japan for superior quality.

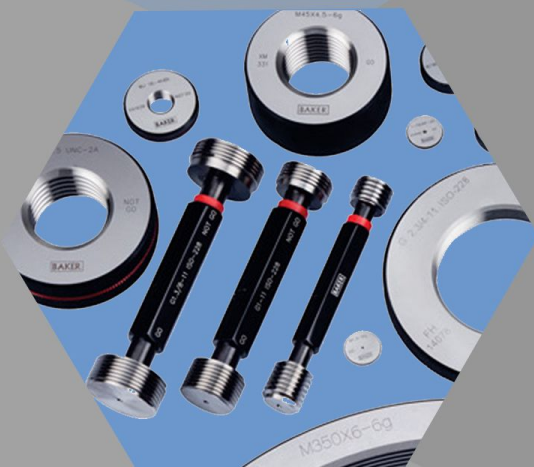

HERUTU

KATASHI
INNOVATIVE PERFORMANCE

Gauges

- Thread plug, thread ring, plain plug, pin, and snap gauges for every possible industrial application.
- Air, slip, air plug, ring, and electronic air gauges as well as air calipers for challenging industrial applications.
- Tested and calibrated gauges for zero errors.
- Certified with IS 4218 Part III: 1999, 724: 1993, IS 4218 Part IV: 2001, ISO 965-1: 1998.
- The products follow strict gauging practice as per IS 2334, ISO 1502: 1996.

BAKER

....a passion for precision

KATASHI
INNOVATIVE PERFORMANCE

Measuring Instruments

- Wide range of measuring instruments for standard as well as non-standard measurement related applications in the industry.
- From water, oil resistant to dust proof instruments. Made for the toughest of the applications.
- Range of measuring instruments cover every possible application with highest possible accuracy.

INNOVATIVE PERFORMANCE

Mitutoyo

MRO

- Industrial grade contact surface cleaners for every type of surface including electrical environments.
- Rust protection, cleaners, multifunctional sprays, and moisture displacers.
- Cyanoacrylate, and instant adhesives for every possible surface.
- PVC, and Steelgrip, and teflon tapes for dry as well as wet areas.
- Liquid sealants for applications with constant contact to liquids.
- Single component RTV and Silicon sealants
- Epoxy, two component epoxy putties for sealing dry as well as wet environments.
- Two component adhesives, resins and hardeners for efficient sealing of every possible material.

IBS

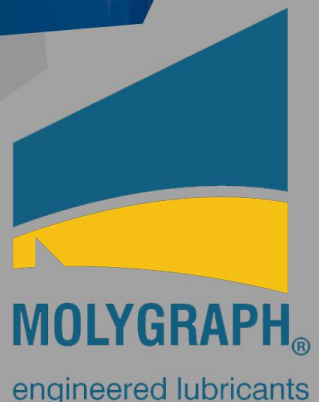

- Gasketing, pipe, thread, hydraulic, silicone, double glazed, insulated glazed, PU, and foam sealants cover every possible industrial application.
- Brushable as well as sprayable polyurethane, rubber and water based, hotmelt, and, pressure sensitive adhesives provide proven solutions in every environment.
- Online and offline contact cleaners and thermal pottings.

Molygraph

Lubricants

- World class speciality lubricants, grease, anti rust and cutting oils for every possible application.
- Technical solutions for food and pharma, steel, oil & gas, metal working and forging, automotive, punching & stamping.
- Highly specialized products for the most general to highly complicated industrial and non-industrial applications.
- Customized special solutions for challenging environments.

Hygiene & Sanitization

- Total mechanized cleaning equipments and solutions for commercial to industrial complexes.
- Solutions offered for floor, sweep, servo, chemical, bio, washroom and carpet care on top of specialized sanitizing equipment.
- Products for budget, economy, and premium range to suit every possible application.
- Global partners from the UK and Italy to provide the highest standards and industrial quality.

Standard Room

Dial Stands

- Magnetic bases with dial indicators to eliminate machine errors.
- Sophisticated bases that can reach every possible position, even upside down with capability of rotating 360°.
- Top fine adjustment bases which can even hold 6mm, 8mm, and 3/8”.

Surface Plates

- Range of surface plates to provide accurate reference plane with bench centers for work inspection and work layout with strict compliance to international quality standards.
- Customized as per specifications of our clients, the plates come in cast iron, precision cast iron, granite, and precision granite surfaces.

NOGA
SIMPLY SOPHISTICATED

LuthrA

Luthra Precision Equipment

KATASHI
INNOVATIVE PERFORMANCE

Magnetic V Block

- Uniform and strong magnetic pull in all three magnetic surfaces (top, bottom and V faces).
- For grinding, milling, drilling and inspection.

Profile Projectors

- Bench, Vertical and Horizontal type profile projectors to suit every type of industrial measurement.
- Able to measure in 2-D space, length, width, angles and points in space.

RANTECH

Miscellaneous Solutions

- Infrared thermometers for industrial applications as well as employee testing with different accuracies and range depending on the application.
- Highly accurate hygro meters to inspect and monitor work environments.
- High precision lux meters for fast and accurate light measurements with data logging.
- TDS meters to monitor water quality for laboratory as well as field configurations.
- Sound level meters for carrying standard-compliant sound measurements for trade and manufacturing units.
- Digital and analog tachometers to accurately monitor motor speeds, counting, process and ratio/draw applications.
- Vibration meters to measure vibrations and oscillations with parameters including vibration acceleration, vibration velocity and vibration displacement for achieving calibrated end products.
- Coating thickness gauges to measure layer depth of coating or films with built-in as well as external sensor probes.
- Illuminated industrial bench magnifiers for manufacturing, assembly and inspection tasks.
- Premium range of airline accessories to go with air tools.
